Garden Modules

Farmer's Market Beds

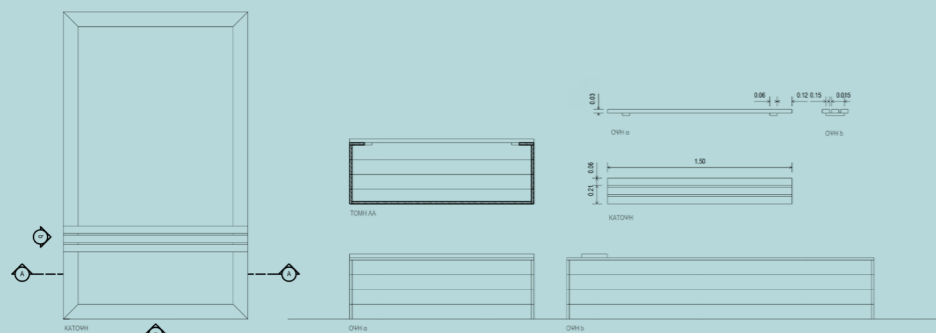

Our community garden features modular, open-source farmer-raised beds designed for easy assembly, adaptability, and resource efficiency. Built from accessible, recycled materials, these raised beds provide an ideal growing environment while promoting sustainable practices that the whole community can replicate. The open-source design enables anyone to construct, modify, and share improvements to the beds, fostering a collaborative spirit and knowledge-sharing within the community. The modular structure allows the beds to be reconfigured or expanded based on seasonal needs or specific crop requirements, maximizing productivity and flexibility.

Dimensions:
 Individual Module
 Width: 2500mm
 Length: 1500mm
 Height: 400mm

Capacity:
 Up to 60 plants
 16L of Soil

Author:
 Gardens of the Future

“By reimagining how we grow, share and live with nature, we plant the seeds for a holistic future where communities and ecosystems thrive together in harmony.”
